

SPECIAL OFFER BY REUTERS TO VISUAL RISK CLIENTS

You can now access high quality end-of-day data from Reuters DataScope Select seamlessly via Visual Risk. The ongoing calculation of financial instruments valuations and complex IAS39 reporting becomes as easy as 'point and click'.

Benefits include:

- Global cross markets coverage from Reuters including best in class coverage of Foreign Exchange and Money markets.
- Stringent validation checks ensure that data you receive from Reuters is data you can trust.
- Customisable files delivered directly by Visual Risk and integrated with your risk management system.

As a special offer, Reuters can provide access to validated end-of-day data via Visual Risk at the price of AUD \$520 per month (price valid as of 1 April 2006, subject to change). If you are already a Reuters client, please contact your Reuters Account Manager to discuss your data requirements in detail.

REUTERS DATASCOPE SELECT

- Comprehensive global coverage of money, foreign exchange, equities, funds, derivatives, and warrants. Includes spot rates on 175 currencies and end-of-day prices from 180 exchanges.
- Fixed income data on governments, corporates, convertibles, high yield, municipals, asset backed and mortgage-backed securities.
- Data for all instruments meet the most stringent mid- and back-office requirements for portfolio valuations and reporting, fund performance measurement and analysis, and regulatory and compliance reporting.

VISUAL RISK

- A leading provider of financial risk management and IAS39 compliance software.
- First software to fully integrate risk analytics, IAS39 Compliance and treasury management in a single system for the corporate market.

The software analyses the most complex hedge portfolios and reports risk profiles in easy to understand visual displays. This facilitates rapid analysis and assessment of risk positions by both treasury and non-treasury managers, greatly improving the management and reporting of a company's market risk.
